- Recap of the parts of a computer
- Typing a story / poem on notepad

ACTIVITIES & EVENTS

- This month boosts of teaching through fun filled activities to keep the children interested.
- To experience a world without sounds, the children were switched to silent mode to imagine what life would be if “The Sound Collector” happened to come by.
- Following Alice’s footsteps in “Milly”, the children also got to see how flour is sieved and made the pancake batter in class.
- The students got a glimpse of the country life in a remote village of Palestine. They even got to know the history behind the destruction there.
- The children took up the challenge and shared them with their peers. They sure beat Grandad’s recipe for pancakes.
- Solids like chocolate, butter and ice were melted to prove that different solids melt at different temperatures.
- The habitats and special features of different birds were shown in a video. Another video showed them to learn about the “Wow” facts of a Snail.
- Interactive work in the journals was done to enhance the students knowledge about mountains.
- A pop-up of Khaana-e-Kaba was made.
- A compass was used to determine the direction of Qibla in the class.
- Vigorous practice of mathematical concepts was done on their white boards.
- The students participated in an exhilarating, fun filled event hosted by Nestle – Nido. The “Mission Nutrition” aims at educating children about the importance of healthy eating habits. The event was thoroughly enjoyed.

Happy Birthday

Ibrahim Choudhry

B is for BEDTIME: On average children need 8 to 10 hours of sleep each night. Sleep is important for many reasons. Lack of sleep can cause kids to be hypersensitive, impatient or cranky. It is more difficult for children to concentrate and learn when they are tired. Some doctors even believe that during sleep the brain “flies away” what is learned during the day. Encouraging quite activities such as reading just prior to bedtime offers a transition that helps children relax. Sweet Dreams!
