ACTIVITIES & EVENTS

An interactive learning environment was maintained and learning continued the fun way.

An animated video of ‘The Selfish Giant’ was shown to know the complete story.

Before starting off with the novel in Literature, students were given an insight into the lives of the royalty. Posters of some real life characters from the novel were shown so that the children could relate to them during the course of reading.

Children were involved in a research activity through which they got to know about 16th century London.

A booklet was given as an assignment to get acquainted with the royalty.

Multiplication was introduced through an activity. Children worked with a handful of beans and grouped them to know that multiplication is repeated addition.

Daily oral drills of tables were done to reinforce tables.

Different electrical appliances were displayed to differentiate between the battery operated and appliances that use mains electricity. Different magnets were used in activities to know how magnets work and which metals they attract.

Interactive learning to know about the different types of maps and how to locate different places on the map.

Flip book activity: Children were involved in an activity in which they located themselves on the map and also labeled it.

Children delivered a PowerPoint presentation on “How to be Good Citizens”, “Ancient China” and “Our Country” which enhanced their communication and interactive skills.

B is for BEDTIME: On average children need 8 to 10 hours of sleep each night. Sleep is important for many reasons. Lack of sleep can cause kids to be hypersensitive, impatient or cranky. It is more difficult for children to concentrate and learn when they are tired. Some doctors even believe that during sleep the brain “flies away” what is learned during the day. Encouraging quiet activities such as reading just prior to bedtime offers a transition that helps children relax. Sweet Dreams!
